Sports & Orthopedic Center opens its doors in Boca Raton

BOCA RATON, Florida (June 2, 2009)—South Florida-based orthopedic surgeon, Dr. Manish Gupta, is pleased to announce the opening of his new medical practice, Sports & Orthopedic Center (SOC), located in Boca Raton, FL. The practice will provide patients with a range of sports medicine services and orthopedic care including arthroscopy and joint replacement.

Dr. Gupta, who was formerly the team physician for the NFL's Baltimore Ravens, is accustomed to treating world class professional athletes, keeping their multi-million dollar bodies in top physical form, and from his new office, he continues to approach patient care with that same caliber of expertise and personal attention.

"At Sports & Orthopedic Center, your quality of life is our primary focus," said Dr. Gupta. "My philosophy is: restore it if it's broken, scope it to repair soft tissues, and replace it if it is worn out. Whether you're an active individual or a professional athlete – you'll receive top notch care at SOC."

The practice, located at 9325 Glades Road, resides in a sleek, state of the art space boasting modern advances such as a paperless office system with fully-computerized charts and medical records. Medical experts around the world agree that electronic patient records can drastically enhance the quality of service at a medical facility by saving time, offering more comprehensive records, and improving overall patient care. There are also flat screen displays in the waiting area and in every exam room, giving patients the opportunity to view informative videos, surf the web, or check their email while they wait.

To ensure the best treatment possible, Dr. Gupta combines his surgical skill with cutting edge technology. The practice offers computer-assisted partial, total, and custom-made knee replacements. For issues pertaining to the hip, Dr. Gupta is one of the few surgeons in the country doing minimally-invasive anterior approach hip replacements as well as hip arthroscopy for treatment of hip pain.
